AI FUTURE OLYMPIAD

AI FUTURE OLYMPIAD (AIFO)

TEACHER & FACILITATOR GUIDE

Grades 5–8

Awareness • Guided Learning • Activities • Practice • Proposed Olympiad

A practical guide for supporting the AIFO learning experience.

ABOUT AIFO

ABOUT AIFO

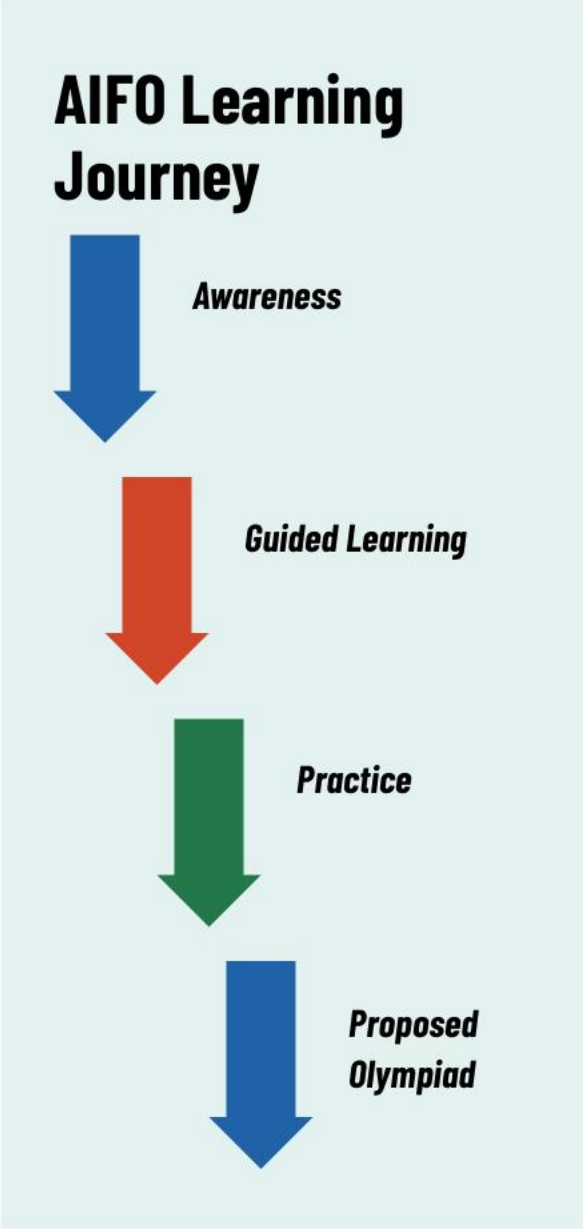

What is AIFO?

AI Future Olympiad (AIFO) is a proposed AI awareness and Olympiad program for students in Grades 5–8.

The program introduces students to:

- Artificial Intelligence
- AI in everyday life
- Logical thinking
- Responsible technology use
- Digital responsibility
- Future possibilities

The program is designed to be age-appropriate and does not require prior coding knowledge.

GUIDE MAP

HOW TO USE THIS GUIDE

This guide helps teachers and facilitators:

- Prepare the awareness session
- Use live demonstrations and activities
- Guide students through their Student Guide
- Support the practice period
- Prepare students for the proposed Olympiad

AIFO Resources

Teachers and facilitators can use the AIFO-provided learning resources throughout the program, including:

- 📘 Student Guides — Grades 5–6 and Grades 7–8
- 🎮 Interactive Activities & Live Demos
- 🎥 AIFO Demo Videos
- 📝 Practice Questions & Scenarios
- 📚 Teacher & Facilitator Resources
- 🎯 Proposed Olympiad Preparation Materials

These resources can be used during classroom sessions, projected for group activities, or shared with students for guided learning and practice.

Core Approach

Explain → Demonstrate → Let Students Try → Discuss → Practice

The goal is to make AI learning interactive, engaging and easy to understand, rather than only reading-based.

PHASE 1: AWARENESS SESSION

Introducing AI

The first stage introduces students to AI through:

- Simple explanations
- Real-life examples
- Live demonstrations
- Demo videos
- Interactive questions
- Classroom activities

Key Principle

Keep explanations simple, visual, familiar and age-appropriate.

Suggested Focus

🤖 *What Is AI?*

Introduce AI using familiar examples.

🌍 *AI Around Us*

Discuss technology students already interact with.

🧠 *How AI Works*

Introduce simple ideas such as patterns, predictions and recommendations.

🔐 *Responsible AI*

Discuss privacy, checking information and responsible use.

💬 *Questions & Discussion*

Give students opportunities to share their ideas.

SUGGESTED SESSION FLOW

⏱️ 1. Warm-Up

Ask students:

“Where do you think you have already used AI?”

Allow students to suggest examples.

🤖 2. What Is AI?

Introduce AI using familiar examples.

Avoid unnecessary technical terminology.

🌍 3. AI Around Us

Discuss:

- Maps
- Video recommendations
- Voice assistants
- Camera features
- Games

🎮 4. Live Demo

Use an AIFO interactive activity or AIFO demo video.

Ask students to predict first, then observe the result.

🔐 5. Responsible AI

Discuss:

- Privacy
- Checking information
- Independent thinking
- Responsible use

💬 6. Q&A

Allow students to ask questions and discuss their ideas.

> 💡 *Tip*
>
> Teachers can pause a demo [illegible] at key moments and ask students what they think will happen next.

LIVE DEMOS & AIFO CONTENT

Make AI Visible

Teachers can use the AIFO interactive demos and provided demo videos during classroom sessions.

Demo 1 — Is It AI?

Give students examples and ask them to classify them.

Goal: Recognising AI in everyday life.

Demo 2 — Train the Machine

Give students examples and ask them to identify a pattern.

Goal: Understanding learning from examples.

Demo 3 — Recommendation Detective

Show how two users can receive different recommendations.

Goal: Understanding recommendations.

Demo 4 — AI Can Be Wrong

Show a questionable AI answer.

"How could we check this?"

Goal: Critical thinking.

Demo 5 — Responsible AI Choices

Give students short situations and ask them to decide whether the use is responsible.

Goal: Digital responsibility.

🎥 *Using AIFO Demo Videos*

AIFO demo videos can be shown directly during the awareness session or guided-learning period.

Teachers can:

Use → Pause → Discuss → Let Students Try → Reflect

Connect each video or der
relevant activity or sectio

PHASE 2

PHASE 2: GUIDED LEARNING

📘 After the Awareness Session

Students move into a guided learning period using:

- 📘 Student Guide
- 🎮 Interactive Activities
- 📽️ AIFO Demo Videos
- 📝 Practice
- 💬 Discussions
- 🔐 Responsible-use lessons

The proposed guided learning period is designed to support students over 2–3 weeks.

Recommended Pattern

01

Learn

Introduce the concept.

02

Explore

Use examples, activities and AIFO content.

03

Discuss

Ask students what they noticed.

04

Practice

Use questions and scenarios.

05

Reflect

Ask students to explain what they learned.

Teacher Tip

Focus on understanding rather than memorising definitions.

Teachers may reuse the AIFO activities and demo videos as reinforcement during the guided-learning period.

TEACHING GRADES 5–6 & 7–8

👧 Grades 5–6

Understanding AI Around Us

Keep it:

Simple • Visual • Familiar • Fun

Focus on:

- What AI is
- Everyday AI
- Humans vs machines
- Can machines think like us?
- Learning from examples
- Safe and responsible AI use

Teaching Tip

Use examples students already know.

Use more demonstrations, visuals and simple questions.

Avoid overloading students with technical explanations.

🧑 Grades 7–8

Thinking Smarter with AI

Keep it:

Beginner-friendly + Slightly More Reasoning

Focus on:

- Learning from examples
- Recommendations
- AI mistakes
- Responsible vs irresponsible use
- Human judgment
- AI and technology careers

Teaching Tip

Encourage students to explain why they think something is true.

Use scenarios and discussions to develop reasoning rather than focusing only on definitions.

READINESS

PRACTICE & PROPOSED OLYMPIAD

📝 Practice Period

Students should be able to:

- Recognise AI examples
- Explain simple concepts
- Reason through scenarios
- Identify responsible AI behaviour
- Question AI outputs
- Explain their answers

Grades 5–6

Understanding > Difficulty

Grades 7–8

Understanding + Basic Reasoning

Practice should remain age-appropriate.

Teachers can use the AIFO Student Guides, activities, demo videos and practice materials to reinforce concepts during this period.

🎯 Proposed AIFO Olympiad

The Olympiad is the proposed final assessment after the learning and practice period.

Suggested Format

60 minutes

Question types may include:

- MCQs
- Reasoning questions
- Scenario-based questions
- Simple puzzles

Grades 5–6

Questions should be:

Basic • Familiar • Short • Enjoyable • Concept-focused

Grades 7–8

Questions can require slightly more reasoning and explanation.

CLOSE & CHECK

RESPONSIBLE AI & FACILITATOR CHECKLIST

⚖️ Four Messages to Reinforce

🔐 *PRIVACY*

Protect personal and sensitive information.

🧠 *THINK*

Don't stop thinking just because AI gives an answer.

✅ *CHECK*

Important information should be verified.

⚖️ *RESPONSIBILITY*

Use technology respectfully and appropriately.

👩‍🏫 Facilitator Checklist

Before the Session

- ☐ Student group confirmed
- ☐ Appropriate Student Guide ready
- ☐ AIFO activities prepared
- ☐ AIFO demo videos ready
- ☐ Live demos tested
- ☐ Devices/internet checked if required

During Learning

- ☐ Students participate
- ☐ Questions are encouraged
- ☐ Examples remain age-appropriate
- ☐ Students try activities
- ☐ AIFO resources are used where appropriate
- ☐ Responsible-use concepts are discussed

Before the Proposed Olympiad

- ☐ Learning period completed
- ☐ Practice completed
- ☐ Assessment paper prepared
- ☐ Answer key secured
- ☐ Instructions prepared

📝 After a Real Implementation

Record only information that actually occurs, such as:

- Topics students understood well
- Common questions
- Common misconceptions
- Activities students enjoyed
- Suggestions for improvement

Do not add school names, student numbers, results, certificates or other outcomes unless they actually happen.

AI FUTURE OLYMPIAD

Learn • Explore • Think • Use AI Responsibly

Grades 5–8

A proposed educational program introducing students to Artificial Intelligence through awareness, guided learning, activities, practice and a proposed Olympiad.
