AI FUTURE OLYMPIAD

AI FUTURE OLYMPIAD (AIFO)

STUDENT GUIDE

Grades 7–8

THINKING SMARTER WITH AI

UNDERSTAND · QUESTION · REASON · USE RESPONSIBLY

No coding required

Explore how AI works, where you see it, and how to use it wisely.

🤖 AI IS ALREADY AROUND YOU

AI isn't only something scientists and engineers work with.

- 🎬 Watch videos
- 🗺️ Use maps
- 🔎 Search online
- 🎙️ Use voice assistants
- 📱 Use smart phone features
- 💻 Interact with digital platforms

AIFO will help you understand AI at a basic level and, more importantly, **think critically about it.**

YOUR AIFO JOURNEY

LEARN → EXPLORE → PRACTICE → THINK

BY THE END, YOU SHOULD BE ABLE TO:

- Explain AI in simple words
- Understand how some AI systems learn from examples
- Recognise AI around you
- Understand why AI can make mistakes
- Make responsible choices when using AI

🧠 HOW DOES AI LEARN?

A simple way to think about some AI systems is:

01 Examples

02 Patterns

03 Prediction

A system can be given many examples.

It can identify **patterns** in those examples and use them when making predictions.

EXAMPLE

A system sees many labelled pictures of:

- 🐱 **Cats**
- 🐶 **Dogs**

It may learn patterns that help it predict what a new picture might contain.

THINK 💭

What might happen if the examples are:

- Too few?
- Confusing?
- Incomplete?

Your idea:

_____

_____

🎬 WHY DO PLATFORMS RECOMMEND CERTAIN VIDEOS?

Recommendation systems can use information such as:

- What someone watches
- What someone searches for
- What they interact with
- Their interests
- Patterns from similar activity

This means **different people may receive different recommendations.**

CASE 🔎

You watch cooking videos every day.

Your friend watches football videos every day.

Would you expect your recommendations to be identical?

Yes / No

_____

Why?

_____

_____

REMEMBER

Recommendations are based on patterns in activity. They are **not always perfect.**

⚠️ WHY CAN AI BE WRONG?

AI is not perfect.

A system may make mistakes because:

- Information is incomplete
- Examples don't cover every situation
- The input is misunderstood
- The prediction is incorrect

IMPORTANT IDEA 💡

> **An answer that sounds confident isn't automatically correct.**

THINK

If an AI gives you an answer that seems strange, what should you do?

- ☐ Accept it immediately
- ☐ Check the information
- ☐ Ask another question
- ☐ Discuss it with a teacher or trusted adult

AIFO RULE

STOP →
CHECK →
THINK

⚖️ GOOD USE VS MISUSE

🟢 GOOD USE

- ✅ Learning a concept
- ✅ Brainstorming ideas
- ✅ Getting explanations
- ✅ Exploring possibilities

🔴 MISUSE

- ❌ Sharing private information
- ❌ Using AI to deceive someone
- ❌ Copying work without learning
- ❌ Trusting every answer without checking

CASE

A student asks an AI tool to complete an entire assignment and submits it without understanding the work.

Is this responsible use?

Yes / No

Why?

_____

_____

REMEMBER

AI should support your learning — not replace your thinking.

👤 AI + HUMAN JUDGMENT

AI can process information quickly.

But people bring things such as:

01	02	03
Context	Experience	Judgment
04	05	06
Responsibility	Empathy	Values

THINK 💭

Should an AI system make **every important decision** for people?

Yes / No

Explain your answer:

_____

_____

KEY IDEA

AI can be a useful tool, but **people still need to think, decide and take responsibility.**

🚀 WHERE CAN AI TAKE YOU?

AI connects with many different areas.

Possible careers include:

- 🤖 AI Engineer
- 📊 Data Analyst
- 💻 Software Developer
- 🎨 UX/UI Designer
- 📱 Product Manager
- 🔬 AI Researcher
- 🔐 Cybersecurity Professional
- 👩‍🏫 Technology Educator

You don't need to choose a career now.

THE IMPORTANT THING:

Stay curious.
Keep learning.
Keep asking questions.

THINK

Which area sounds interesting to you?

Why?

_____

_____

🎮 EXPLORE AI

1 1. TRAIN THE MACHINE 🧠

Look at examples provided by your teacher.

Try to identify the pattern.

Then predict what might happen with a new example.

Would your prediction always be correct?

Why?

2 2. RECOMMENDATION DETECTIVE 🔎

Compare two imaginary users.

What could make their recommendations different?

3 3. AI CAN BE WRONG ⚠️

Look at an AI-generated answer.

Find something that should be checked.

What would you check?

CHALLENGE

Don't just find an answer — think about whether the answer makes sense.

✏️ AIFO PRACTICE

Answer briefly:

1. What does “learning from examples” mean?
2. Why might two people receive different recommendations?
3. Give one reason AI can make mistakes.
4. Why should important AI information be checked?
5. Give one responsible use of AI.
6. Give one example of AI misuse.

🎯 AIFO CHECKPOINT

- ☐ I understand how AI can learn from examples.
- ☐ I understand why recommendations can differ.
- ☐ I know AI can make mistakes.
- ☐ I can recognise responsible and irresponsible AI use.
- ☐ I understand why human judgment matters.
- ☐ I can explain my reasoning.

🌟 FINAL THOUGHT

One thing I will remember about using AI responsibly:

_____

_____

_____

Ready?

Practice → Proposed AIFO Olympiad
