

AI Future Olympiad (AIFO)

A structured AI awareness & Olympiad program for Grades 5–8 — building responsible, curious, and future-ready learners through short lessons, guided practice, and a friendly competition.

Why Teach AI to Grades 5–8?

Everyday AI

Students use AI daily (YouTube suggestions, voice assistants, filters) but don't understand how it works.

Early Awareness

Teach basic ideas early to build safe and responsible habits.

Future Readiness

Help students develop thinking skills for future learning and careers.

The Current Gap

Students use AI every day.
But schools rarely teach how it actually works.

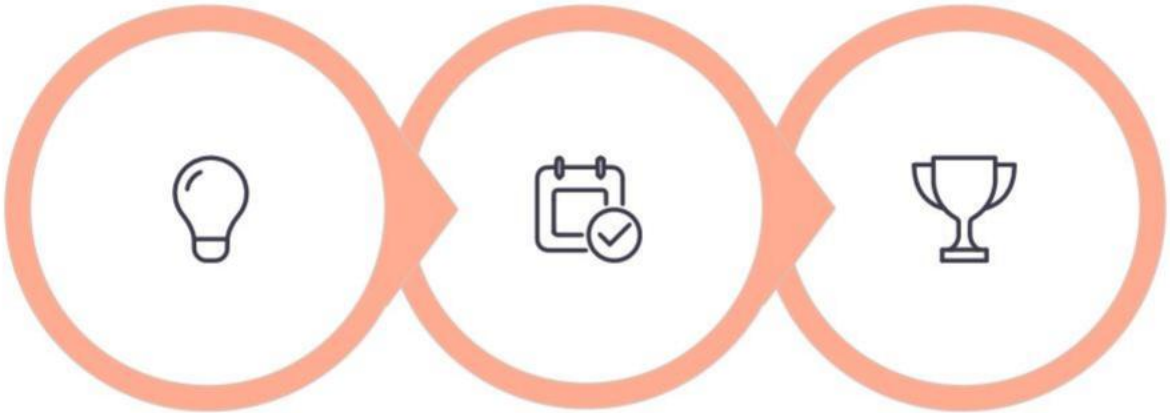

The Problem

- No structured AI learning for Grades 5–8
- Minimal focus on safe & responsible AI use
- Missed opportunity to build logical thinking early

AI is used as a **tool** not understood as a **concept**.

Our Solution: AI Future Olympiad

Designed for Grades 5–8, our three-phase program combines engaging AI awareness sessions, structured learning support, and a friendly Olympiad to assess understanding and ethical thinking.

PHASE 1
Awareness

PHASE 2
Learning Support

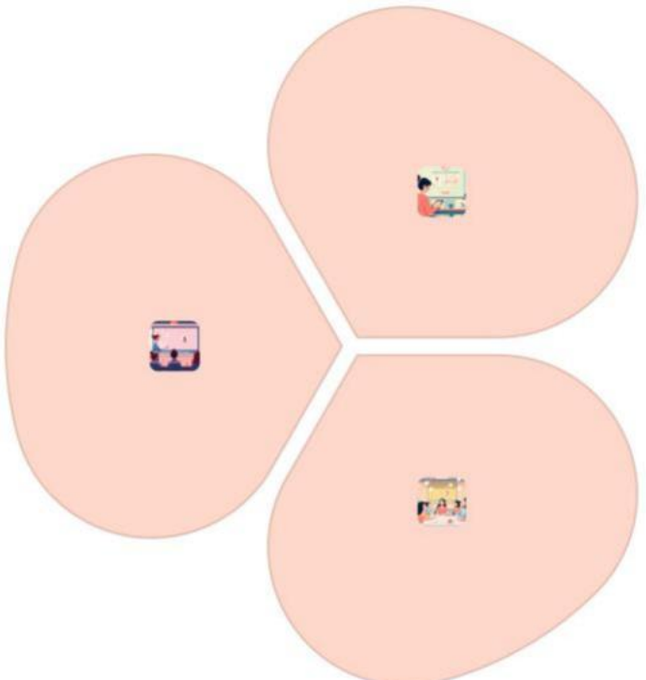

PHASE 3
Olympiad

Phase 1 – Awareness Session

Introduce students to AI in a simple, exciting, and relatable way.

Live AI Demos

Short hands-on demos to spark interest.

Real-life Examples

Show familiar apps that use AI.

Interactive Q&A

Guided questions to prompt reflection.

OUTCOME - Students understand:

- What AI is (and what it is NOT)
- Where they already use AI daily
- Why responsible use matters

Phase 2 – Learning Journey

Step-by-step activities and resources that build practical AI understanding for Grades 5–8.

Guided Booklet

Clear, age-appropriate explanations with examples and short reflection prompts.

Practice Activities

Hands-on challenges and simulations to apply concepts and boost reasoning skills.

Ethics & Responsibility

Short lessons on privacy, bias, and safe, responsible AI use.

Outcome- Students Gain :

- Foundational AI knowledge
- Stronger problem-solving skills
- Responsible digital habits

Phase 3 – Olympiad Exam

The final, low-stakes assessment of students' AI knowledge, reasoning, and ethical judgment.

Purpose

Evaluate AI awareness and practical reasoning through student-friendly questions.

Format & Access

60-minute exam with MCQs, cases, and puzzles; proctored in schools or supervised online.

Outcome

Participants earn an AI Awareness & Logical Thinking certificate on completion.

Curriculum Highlights by Grade Band

Grades 5–6: Understanding AI Around Us

- What is AI?
- Where do we see AI daily?
- Humans vs Machines
- Using AI safely

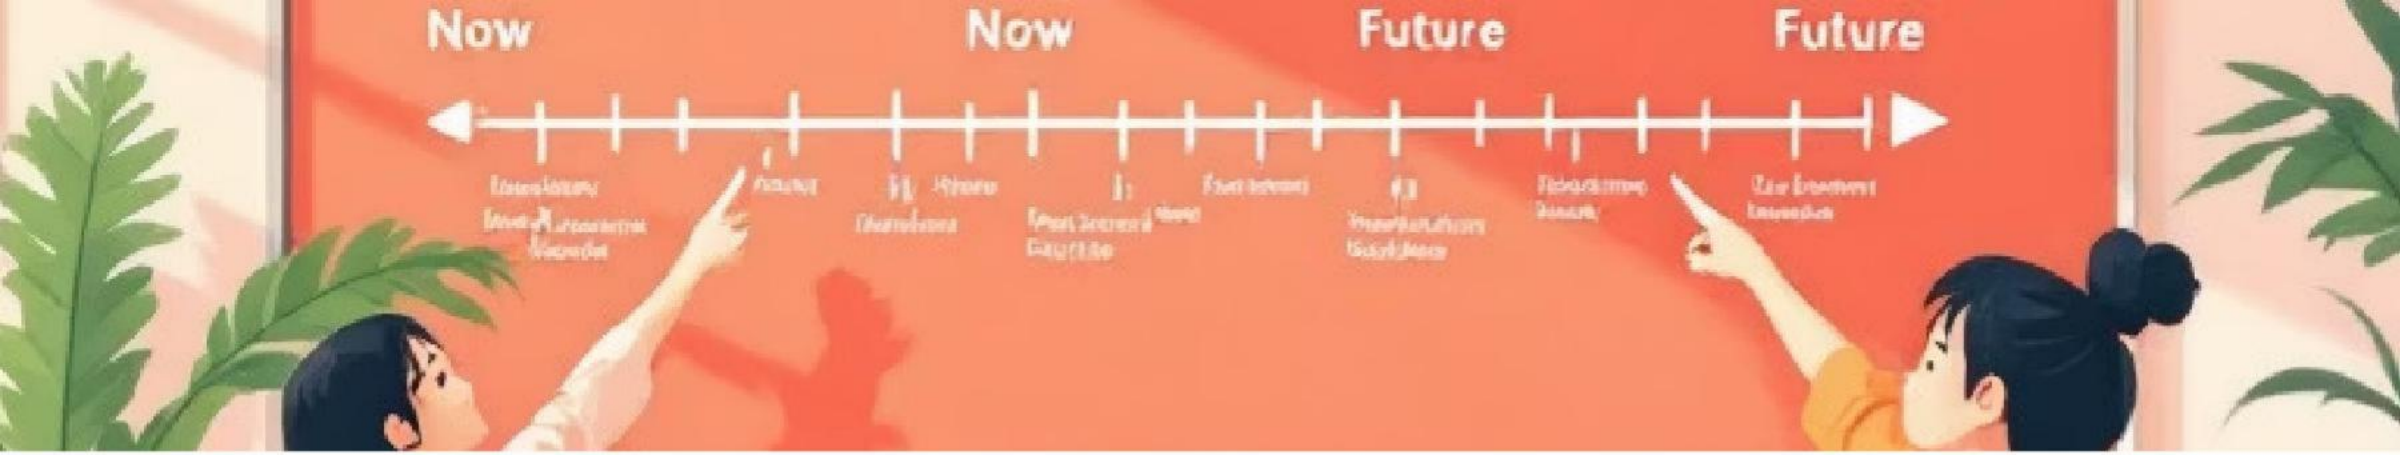

Focus: Awareness & Safe Use

Grades 7-8: Thinking Smarter Than AI

- How does AI learn?
- Why does YouTube recommend videos?
- Can AI make mistakes?
- Good vs Misuse of AI

Focus: Logical Thinking & Responsibility

Why This Matters Now

Students already use AI every day. But without guidance,AI becomes a shortcut not a skill.

- Early understanding builds smart decision-making
- Reduces misuse and blind dependence
- Develops critical thinking that lasts

Teach AI today.
Prepare leaders for tomorrow.

From AI Users to AI Thinkers

Before AIFO

- Uses AI without understanding
- Relies on tools blindly
- Limited awareness of risks

After AIFO

- Understands how AI works
- Thinks critically before using tools
- Makes responsible digital choices

AIFO transforms passive usage into informed thinking.

Proposal & Next Steps

We invite your institution to introduce AI Future Olympiad (AIFO) for Classes 5–8.

The program is:

- Age-appropriate
- Academically structured
- Easy to implement

1

Intro Meeting

Customize dates, scope, and logistics with administrators.

2

Deliver Sessions

Awareness sessions + guided learning over 1-2 weeks.

3

Host Olympiad

Conduct 60-minute exam and award certificates.

We invite your school to pilot AIFO this semester. Contact us to schedule a planning call and receive sample materials.
